**Need:**

Optimal air handling solution with total flexibility concerning functions and options.

**Solution:**

Re-circulating air handling units, full fresh air units and units with heating/cooling recovery wheels.

# We deliver the best individual solution for any customer

Fläkt Woods has delivered the fans for one of its largest ever contracts, a £3.5 million agreement providing the total air handling solutions for Schering-Plough's plant and research and development facilities in Singapore.

## Expertise and global support

The contract involved the complete range of Fläkt Woods skills. The Company had to liaise with designers throughout the world, and demonstrate to the client and the client's project engineers that Fläkt Woods was the only company that had the expertise, global support and knowledge to meet their complete ventilation requirements.

## Large variety

Fläkt Woods supplied a large variety of re-circulating air handling units, a small number of full fresh air units and some units with heating/cooling recovery wheels.

Some of the air handling units were for hazardous areas and there was a mix of units with centrifugal and axial flow fans to suit the many and varied processes that Schering-Plough is carrying out on this site.

In addition to the air handling units Fläkt Woods supplied a large number of industrial centrifugal extract and materials handling fans and some stainless steel Fan Coil Units for the R & D facility.

## Manufacturing facility

The project, which was one of the largest worldwide R & D schemes, with an overall investment of US\$730 million, involved Schering-Plough building extra plants, in addition to the Company's 3 existing manufacturing plants; and a new tableting factory and R&D facility. These will manufacture a range of active pharmaceutical ingredients as well as final product forms.

## Fläkt Woods Group

Fläkt Woods is a global company providing solutions for ventilation and air treatment for buildings as well as fan solutions for Industry and Infrastructure applications.
